

## Make a Paper Rocket with

CONCORDIA  
COLLEGE™

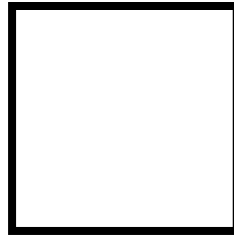

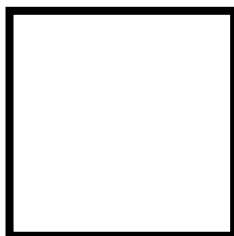

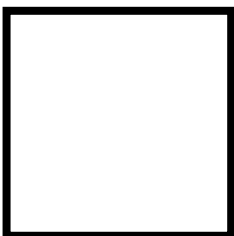

Science Academy

Use the Code or check us out at [www.concordiascienceacademy](http://www.concordiascienceacademy) for more including a video of us making rockets using this sheet.

---

- YOU WILL ALSO NEED: Colored pens or pencils, a long pencil, scissors, tape, a straw and a deep breath.
- Color in the boxes below that will make your rocket.
- Have a grown up cut out the shapes with a pair of scissors.
- Roll the long piece of paper tightly around the pencil and tape along the long edge making sure your colored side shows.
- Fold over one end of the tube into a cone shape and tape shut.
- Remove the pencil and blow gently into the open end of the paper rocket. Is any air escaping? Use more tape to seal if needed.
- Fold the fins in half to make triangles and tape these to the base of the rocket to make fins. These will make it fly even better
- NOW Insert a straw into the rocket, take a deep breath and blow...
